DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, drawn to a process for regeneration non-combustible sorbents, classified in class 502, subclass 20.
- II. Claims 27-54, drawn to a process for regenerating non-combustible sorbents that comprise a metal, classified in class 502, subclass 20.
- III. Claims 55-80, drawn to a process for regenerating non-combustible sorbents where the support is selected from acidic zeolite, acidic alumina, alumina, classified in class 502, subclass 20.
- IV. Claims 81-106, drawn to a process for regenerating non-combustible sorbents comprising a metal and comprising exposing a sorbent to a gas, classified in class 502, subclass 38.
- V. Claims 107-121, drawn to a process for regenerating non-combustible sorbents comprising exposing a sorbent to a gas, classified in class 502, subclass 38.

The inventions are distinct, each from the other because of the following reasons:

Inventions described above are directed to related processes. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the

inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed are not obvious variants of each other. Group I for example does not require a metal comprising sorbent, while Group II does, Group III requires specific metal comprising supports which include acidic metals, Group V requires a exposure of the sorbent to a gas. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
